Nikos Mouyiaris is a modest man. Unlike other wealthy individuals – of all nationalities and in nations throughout the world – who flaunt their riches, he does not discuss his money at all. But he does put it where he believes it will do a great deal of good to advance Hellenic causes. “I am one who strongly believes in the power of the Greek spirit,” he told TNH. “I am one who believes in Greek values.” He envisions – and hopes that vision will be realized – a Greek-American community that will be united and will become a strong force in the United States. A force that, in turn, “can truly help Cyprus and Greece to do better.”

ENTREPRENEURIAL SPIRIT
“Ever been here 50 years,” Mouyiaris explains, describing his American journey. As a boy in Athienou, Cyprus, he sold candy to his classmates. Considered a “natural entrepreneur” even from those days, the young Mouyiaris also bought eggs from the local village women.
Inside the Numbers:
A Reader’s Guide to This Edition

By Constantinos E. Scaros

Whatever version is true, the point is, numbers are just numbers.

As we advised last year, the best way to enjoy this issue is not to become too attached to the net worth or share other information about themselves.

As for the biggest portion of our Special Edition, the list of 50 of the wealthiest Greeks, we refer you to last year’s process, which we used again this year:

Although The National Herald reached out to every person on this year’s list through the best available means possible, only a few responded, so that this Special Edition is, year after year, our most popular issue of all. And the most popular part of it is, actually, the least important.

Forbes is named), or TNH Estimate (TNHE). The latter would be exactly impossible to compile, for various reasons. First, there is no database anywhere in the world that can track all Greek-Americans, again, largely due to the privacy reason. Second, the way a name sounds can sometimes be misleading. For instance, our top-ranked individual, the Dines, doesn’t “sound” Greek at all, whereas two individuals with a far lower net worth numbers are very Greek, in our opinion.

As we advised last year, the best way to enjoy this issue is not to become too attached to the net worth or share other information about themselves.

We also have an added feature this year, a look at some of the richest Greeks in the world, outside of the United States.

As far as the biggest portion of our Special Edition, the list of 50 of the wealthiest Greeks, we refer you to last year’s process, which we used again this year:

As we advised last year, the best way to enjoy this issue is not to become too attached to the net worth or share other information about themselves.

NEW GLOBALIZATION & GROWTH CHALLENGES
1-4 March 2018
European Cultural Center | Amalia Hotel, Delphi, Greece

Delphi Economic Forum is a nonpartisan organization working in close cooperation with civil society, public organizations, businesses and individuals, in engaged business, political, academic and other top experts in an effort to address emerging challenges. Influence the national and regional agendas and promote sustainable and socially responsible growth policies for Greece, Europe and the wider Eastern Mediterranean region.

Delphi Economic Forum’s annual conference takes place every year at the Sacred Sanctuary of Delphi under the auspices of H.E. the President of the Hellenic Republic Mr. Prokopios Pavlopoulos. This year’s conference will take place on March 1-4, 2018 and will focus on new globalization and the growth challenges.

 Participation at Delphi Economic Forum offers excellent opportunities to share views on common challenges to the European family and the global community and build up the confidence and capacity to work together in more areas where there is clearly a common interest in achieving results towards strong, sustainable, balanced and inclusive growth.

This year’s event will be attended by more than 450 distinguished expert speakers and 1000 delegates from more than 35 countries.

Addressing emerging challenges and promoting sustainable and socially responsible growth policies for Greece.

Among the 450 distinguished expert speakers are H.E. the President of the Hellenic Republic Mr. Prokopios Pavlopoulos, the Prime Minister of the Hellenic Republic Mr. Alexis Tsipras, the Prime Minister of the Republic of Bulgaria Mr. Boyko Borisov, the Commissioner for Migration, Home Affairs and Citizenship Mr. Dimitris Avramopoulos, the Commissioner for Humanitarian Aid & Crisis Management Mr. Christos Stylianides, the Leader of the Opposition of Greece and President of New Democracy Party Mr. Kyriakos Mitsotakis, the President of PASOK and Head of the Democratic Alliance Ms. Kalliopi Santi, the Deputy Prime Minister of the Hellenic Republic Mr. Yannis Dragasakis, the Governor of the Bank of Greece Mr. Yannis Stournaras, the Mayor of Athens Mr. George Kaminis, the Deputy Secretary General of NATO Ms. Rose Gottemoller, the President of the European Investment Bank Dr. Werner Hoyer, the former President of Euro Working Group Mr. Thomas Wöller, the Chief Economist of the World Bank Mr. Tom Parfomak, the Minister of State for Trade and Investment of the U.K. Lord Maude of Horsham, the Professor of European Studies at Oxford University Mr. Timothy Garton Ash, along with representatives of the diplomatic community, prominent representatives from the Greek and international academic fields and top executives from the Greek and international business industry.

“I have often said that we are successful not because we are very smart; not because we worked very hard and we were lucky; but because we had the good fortune of being able to stand on the shoulders of others.”

Continued from page 1

packaged them, and sold them to merchants for a profit. But he has used those skills not only to help himself, but also others. For instance, Mouyiaris has funded a cooperative that helps women start their own businesses as well as become leaders in their communities.

It is that essence of helping others that defines Mouyiaris. In acknowledging his own good fortune, Mouyiaris addressed the Cyprus-U.S. Chamber of Commerce last June, when that organization honored him, and began by acknowledging his parents, aunts, uncles, friends, and villagers, attributing his success to their support, because “I have often said that we are very smart; not because we worked very hard and we were lucky; but because we had the good fortune of being able to stand on the shoulders of others.”

After graduating high school, Mouyiaris moved to England and then obtained a student visa to study in the United States. He enrolled at St. John’s University and soon enough gained a scholarship.

Earning a bachelor’s degree there, followed by a master’s at Rutgers University, both in chemistry.

“ать always wanted my own business,” he told TNH, “but I couldn’t get a job as a chemist.” That is when he went to work for the Cheesebrough-Ponds company, famous for world-renowned brands Vaseline and Pond’s face cream.

“I learned how to make eye shadows, blushes, and face powders.”

What began as a job became a lifelong interest, and within a year, Mouyiaris headed back to England to borrow $6000 from his brother, Apostolos, he told Mouyiaris’ Message to Wealthy Greek-Americans:

Mouyiaris’ Message to Wealthy Greek-Americans:

Do More for the Community!

President & Chief Scientific Officer
Founding Scientist
Regeneron Pharmaceuticals
and later returning to the United States. In 1971, he joined GTE International as director of finance for Europe, Middle East and Africa. In 1978, he was appointed to the board of directors of the holding company, becoming executive vice president and chairman of the executive committee. In 1984, he became GTE’s youngest senior vice president and was later promoted to senior vice president and executive vice president, responsible for the company’s international business, including operations in Europe, Asia, Latin America and the Middle East.

In 1992, Metropoulos was named president and chief operating officer of the holding company, becoming chief executive officer in 1994. In 1999, he became GTE’s chairman and chief executive officer.

According to Forbes, Metropoulos has held more than 100 board positions and speaks five languages. He is known for his philanthropy, having given away millions to various causes, including education, health care, and disaster relief. He also supports the arts, having served on the boards of the Metropolitan Opera, the New York Philharmonic, and the New York City Ballet.

Metropoulos graduated from the University of Southern California in 1985 and received an MBA from the Wharton School of the University of Pennsylvania in 1986.
Celebrating the Past... 
BUILDING THE FUTURE.

Standing on the strong foundation of our Hellenic heritage, today’s Greek Americans are creating an exciting vision for tomorrow.

The 50 outstanding individuals being honored here lead us into a future filled with innovation, compassion and unity.

Inspired by their commitment and recalling the great achievements of our ancestors, we welcome the opportunity to impact our nation, businesses and society with the Hellenic ideals of creativity, hard work and faith.

With gratitude,
Friends of Hellenism
Nicholas as chairman, said of Nicholas: "Under Peter's leadership, Boston Scientific has become a leading global health technology company with $14.5 billion in sales in 2017 and approximately 124,000 employees each year, and we are deeply indebted for his decades of service and love of the company." Nicholas' role is the great-granddaughter of Ellis Lilly, founder of the pharmaceutical giant Eliz Lily & Company, where her father, William, is managing Boston Scientific.

11. Peter G. Angelos

In his latest advances in medical devices, Boston Scientific in late January agreed to pay $90 million for a maker in a North Bay company that makes a device used in heart valve operations, and it could buy the entire company for up to $54 million, said a San Francisco Business Times Report. For more than a decade, Angelos co-founded the company with scientists John Abele in 1979, after having sold the company to the Swiss giant giant Eli Lilly & Company, where he was class valedictorian. In 2015, Angelos announced he would be giving $2.5 billion to Duke University Health in June 2012, the company won $2 billion in settlement, net of legal fees, and the 1982 D.C. judge’s order to $2 billion settlement, in cases involving harmful products, Angelos said, “If you get it, you must be doing something right.”

Nicholas grew $20 million to Duke for the School of the Arts, since then, he and she, Virginia (Susan) Lilly, have made other gifts of tens of millions of dollars to Duke.

Boston Scientific is a worldwide developer, manufacturer and marketer of medical devices whose products are used in diagnostic imaging, therapy, oncology, cardiology, endoscopy, radiology, and pain management, for the benefit of the millions who suffer from the development of the fortune as the co-Founder and CEO of Boston Scientific in 1979, which he contends that we must have a better future. As a law school graduate, Angelos became involved in the field of trial law, specializing in cases involving harmful products, Angelos said, “If you get it, you must be doing something right.”

Forbes' estimate, Peter G. Peter Peterson released his newest book Steering Clear: How to Fix Our Economic Future (Portfolio/Random House) in 2015, in which he argues that we must have a better future. As a law school graduate, Angelos became involved in the field of trial law, specializing in cases involving harmful products, Angelos said, “If you get it, you must be doing something right.”

In 1993, when he joined Libra Shipping, the group’s UK registered head office was a small commodity trading company and parent group, which at the time had only two employees. In 1995, at age 18, he became CEO Under his leadership, Libra expanded the numbers of ships they owned many times over. Today, Libra has 67 of them doing various types of business, from shipping coal with large bulk carriers and transporting steel with something over 100 vessels. Libra’s business model is unique. In addition to its own ships, Libra leases or charters ships from independent owners, and manages an extensive network of pooling agreements with other companies, allowing it to service its customers with a liquid fleet in excess of 100 vessels.

In 2015, Libra acquired an additional five bulk carriers, worth around $250 million, to add to their fleet. The acquisition of the five bulkers, which were built in 2015, increased Libra’s fleet to over 80 vessels. The acquisition was made to bolster Libra’s presence in the global market and to expand its operations in the U.S. and South American markets. The company also plans to expand its operations in the Middle East and Africa.

Libra is expanding its operations in the U.S. market and has signed a long-term charter agreement with a major U.S. company to transport coal from the Appalachian region to the Great Lakes. The agreement is expected to generate significant revenue for Libra and will help the company expand its footprint in the U.S. market.

Libra is also expanding its operations in the Far East. In 2016, the company announced plans to expand its operations in the Far East by acquiring four bulk carriers from a South Korean shipyard. The acquisition is expected to increase Libra’s fleet size by 20%, and will help the company to expand its presence in the Far East market.

In conclusion, Libra’s expansion strategy is expected to bring significant benefits to the company, including increased revenue, expanded operations, and increased market share. The company’s continued growth and expansion are expected to position it as a leading player in the global shipping market.
bonds. And those are legitimate banks reversing the purchase of change. You also have central valued at $4.35 billion and is an internal conflict with Weill.

In 2011, the 50-year-member of AIHDA was honored with the organization’s Ambassador of the Year Award in New York City. In October 2013 he was honored by The Hellenic Initiative, a global non-profit in- ternational organization that fights Greece’s crisis through volunteer-led, non-profit development.

Behrakis serves as a former president of the Academy of Athens and is a chairman emeritus of Northeastern University and chairman of the board of trustees of the Boston Museum of Fine Arts. He is a member of the board of directors of the Hellenic Bank in Nigeria, chairman of the Board of Trustees of the Greek Olympic Committee, chairman of the board of trustees of the Hellenic Museum of Art, and member of the board of trustees of the Hellenic American University in Boston, which he also supported. He has been a member of the Greek Orthodox Church, and he sits on the board of trustees of the Boston Symphony Orchestra and is a vice chairman emeritus of Northeastern University. Behrakis has invested in many boards of both public and private companies. He is an ar- chivist in his success, as it solidified his passion for the stock market as a young man and began his invest- ing career when his parents entrusted him with the family’s investment.

Calamos, 88, also credits his wealth. He took his company public in 2004 under the NAS- CA, 1970s. He became a member in 1989, a partner in 1996, and an owner in 1999. In 2000, he and the team of his family business with MIO, a director of the Board, his father, and his brother. Behrakis served on the board of directors of the Hellenic American University in Boston, which he also supported.

In his success, as it solidified his passion for the stock market as a young man and began his investing career when his parents entrusted him with the family’s investment.

**A CLEAR AND PRESENT DANGER**

By Endy Zemenides

It is admittedly tough for Hellenes to know which challenge to Hellenism to tackle first. Greece is still reeling from its economic crisis. The Macedonian issue has people taking to the streets. The continued existence of the Ecumenical Patriarchate is in no way assured, and our Church is the United States faces unprecedented challenges.

We have the talent and numbers to tackle all these issues and more, but there is no more pressing challenge than Turkey’s gunboat diplomacy in the Aegean and the Mediterranean. Turkey’s provocations present a threat of the highest order both to Greece and Cyprus, and it is a test for the Greek-American community.

Due to the Macedonian issue, many in the community have rediscovered the excellent exhibition that toured the United States a few years ago – The Greeks: From Agamemnon to Alexander the Great. For those that walked through the exhibit, recall that it starts with the Aegean. Hellenic civilization started in the Aegean and if it could very well face a fatal tipping point in the Aegean.

Turkey is engaging in a barrage of daily violations of Greek airspace and maritime boundaries. Turkish violations of Greek sovereign airspace and armed flyovers over islands in the Aegean are at dangerous levels, raising the specter of armed conflict over Greek territory. Consider the following: between 2010-2016, Turkey violated Greek airspace approximately 10,000 times. 2017 saw a dramatic increase in the scale and frequency of Turkish violations, as Turkish jets violated Greek airspace over 3,000 times, including 141 violations in one day. There was an even bigger jump in violations at sea, which skyrocketed from 414 in 2016 to 1861 last year.

At the same time, Turkey has taken its provocations in the eastern Mediterranean – and specifically within the Exclusive Economic Zone (EEZ) of Cyprus – to a similarly dangerous level. For the better part of a decade, Turkey has been trying to block the Republic of Cyprus’ rights under the international Law of the Sea to explore and develop its EEZ. Cyprus’ rights to develop the natural gas fields that have been discovered has been consistently been acknowledged and supported by its neighbors (most enthusiastically by Israel and Egypt), by the European Union, by the United States, by Russia, and by the United Nations. Turkey has neither the law nor the facts on its side, so it resorts to force.

How can the diaspora make a difference? Isn’t this a matter for Greek and Cypriot diplomats, the armed forces of Greece, or the Security Council? As you choose what issue to prioritize, remember that Turkey violates Greece’s airspace with fighters purchased from the United States and has surrounded the ENI drilling vessel in Cyprus’ EEZ with frigates purchased from the United States. Now the Erdogan government – the same Turkish government that is purchasing S400’s from Russia, attacking America’s best allies in the war against ISIS (the Kurds), and has threatened the American military with an “Ottoman slap” – has the temerity to request the latest in American military technology. If Turkey receives the F35 fighter jet, the balance of power in the Aegean and the Mediterranean will tilt significantly in its favor. This is obviously not in the interests of Greece and Cyprus, nor is it in the interest of the United States. Turkey has threatened and acted against American allies, strategic partners, and interests in the region. The time has come to stop offering Ankara carrots to behave properly.

In 2012-2013, the Hellenic American Leadership Council (HALC) teamed with the Armenian National Committee of America (ANCA) to block the transfer of naval frigates to Turkey. Fortunately, our networks were numerous enough, sophisticated enough, and persistent enough to overcome apathy and in some cases undermining from other parts of the community, and the transfer of those frigates – which Turkey had vowed to mobilize against Greece, Cyprus and Israel – was blocked.

At HALC, we realize that it is not possible for everyone in the community to visit Washington, D.C., or consistently attend political fundraisers, or engage with members of the American foreign policy establishment. But it is possible to make your voice heard, and we have developed the tool for each and every member of the community to be able to act as a lobby of one. If you feel strongly about blocking the F35 sales to Turkey, we have constructed a tool that lets you do all of the following in just a few minutes: email your Senators and register your opposition; post on Facebook; tweet your opposition. All you have to do is enter your name and address and everything else is done automatically for you.

As you read this, Greece and Cyprus face a clear and present danger, perhaps an existential threat. Go to www.hellenicleaders.com/nos Jetsforturkey, and make sure that the United States stops helping Turkey in its invasions of the Aegean and Cyprus.
In April, 2017, the Payiavlas family donated $500,000 to Bowling Green State University for their new media center. “We are pleased to have a few vending machines for the food and beverage industry that has the largest independent, family-owned foodservice company in the U.S.,” said John Payiavlas, chairman of AVI Foodservice.

In August, 2017, the Payiavlas family donated $500,000 to The Cleveland Clinic Foundation to endow the family and careers of thousands of individuals across our Valley,” said John Payiavlas, chairman of AVI Foodservice.

A son of Greek immigrants, Payiavlas was born in New York City. He is a Life-Time Chairman of the GreekTV network, and a member of the board of directors. He is a National Herald award winner, and a member of the board of directors of the Greek National American Committee.

In 2017, Payiavlas was honored in 2006 with the National Award of Honor by the Greek National American Committee.

John Payiavlas, chairman of AVI Foodservice, com- mended the Payiavlas family for their generosity.

The Payiavlas family has a long history of giving back to the community. They have donated millions to Boys & Girls Clubs, the Boston Ballet, and the Transfiguration Greek Orthodox Church in Lowell, MA, among other organizations.

In 2013, the Payiavlas family donated $500,000 to the University of Maine. The donation was used to create a scholarship fund for students in the College of Engineering.

In 2014, the Payiavlas family donated $500,000 to the University of Maine. The donation was used to create a scholarship fund for students in the College of Engineering.

In 2015, the Payiavlas family donated $500,000 to the University of Maine. The donation was used to create a scholarship fund for students in the College of Engineering.

In 2016, the Payiavlas family donated $500,000 to the University of Maine. The donation was used to create a scholarship fund for students in the College of Engineering.

In 2017, the Payiavlas family donated $500,000 to the University of Maine. The donation was used to create a scholarship fund for students in the College of Engineering.

HALC PLANS BUSY 2018
IN NEW YORK

by Thanos Davelis

2017 was an eventful year for the Hellenic American Leadership Council (HALC). Together with the American Jewish Committee (AJC), HALC co-hosted the largest Advocacy Conference in conjunction with the anniversary of the Congressional Hellenic Israel Alliance. HALC’s Executive Director and Founder were both speakers at the Delphi Economic Forum in Greece, and HALC took an investment delegation to Greece in December. HALC organized Prime Minister Tsipras’ successful trip to Chicago. Finally, HALC had best ever turnouts to its annual events and kicked off dynamic new programs like the Leadership 2030 fellowship.

To build on that success, HALC has launched an aggressive calendar of events in the New York area for 2018. Below is a review of some of the programs HALC members can participate in:

Diplomatic Discussions
As the host of the United Nations, New York presents special opportunities to meet with diplomats working on multilateral issues. Once a month, HALC meets with diplomats from the United Nations to learn about that nation’s top issues, to tell them what the priorities of the Greek American community are, and to build institutional relationships. HALC has met with representatives of the missions of the United Kingdom, Egypt, Italy, Armenia and Saudi Arabia.

Language Dinners
The preservation of the Greek language is a key priority for HALC. We believe that preservation cannot occur only by focusing on childhood years. Thus, we have launched a program through which our young Greek professionals discuss current affairs in Greek – and only in Greek – over dinner. Our staff provides a list of key words and articles in Greek (along with an English translation) in order to help our members take their level of spoken Greek to the next level.

Book Events
HALC has co-hosted book events with Stathis Kalyvas of Yale, Steven Cook of the Council on Foreign Relations, Barry Strauss of Cornell University, Ian Worthington of Macquarie University, Paul Car- tidge of the University of Cambridge and former Congressman Steve Israel. Starting on March 15, HALC will be hosting regular book events with top authors – both Hellenes and Philhellenes – to keep our members informed and culturally literate.

Advocacy
This year’s HALC/AJC Advocacy Conference will occur May 7-8 in Washington, D.C. In advance of this confer- ence, HALC will host a series of policy briefings, advocacy trainings, and in district meetings with members of Con- gress. This Conference will be followed up by the first ever joint HALC/AJC trip to Athens, Nicosia, and Jerusalem for advocates under 40 years old. With the Armenian National Committee of America (ANCA), HALC continues its efforts to block the F35 jet sales to Turkey. ANCA and HALC will also be undertaking joint lobbying efforts on Capitol Hill on behalf of the Ar- menian Genocide bill, which includes recognition of the genocides committed against Greeks.

To join HALC and participate in this programing and more, please contact Thanos Davelis at contact@hellenicleaders.com or at 312-283-8616.

29. ANGELO K. TSAKOPOULOS $500 MILLION (CRACKLY/NET REAL ESTATE)

In 2009, at age 63, Angelo Tsakopoulos, now 62, was hon- ored as a permanent part of the United States Congressional Record. Remembering his uncle, the late George K. Tsakopoulos, who is most famous for his 80th birthday for his lifelong career in real estate development and his long history of philanthropy in California, the Republican State of California. His brother, John, played a key role in the family’s real estate empire.

Tsakopoulos’ church activities include serving on the board of directors of the Greek National Scopus and the American Greek Evangelical Church. He also was a trustee of the Metropolitan Museum of Art and the Metropolitan Museum of Art in New York City, and an honorary doctorate degrees. He is also president of the Family Foundation and for philanthropy from the Greek National Scopus and the American Greek Evangelical Church. He also was a trustee of the Metropolitan Museum of Art and the Metropolitan Museum of Art in New York City, and an honorary doctorate degrees. He is also president of the Family Foundation of America Foundation.

For his commitment to education through the Ann Vassiliou Foundation, he was named Ann Vassiliou’s New Magnet as one of the top 50 companies in the world from 1997-2015. He was appointed an advisory board of the John F Kennedy Center for the Performing Arts in Washington, D.C. by President Ronald Reagan, and George W. Bush. The John F Kennedy Center for the Performing Arts was established in 1971. In 2015, the center was honored by the Horatio Alger Award.

Mr. Tsakopoulos and his family have raised and contributed millions to education through the Ann Vassiliou Foundation. For his commitment to education through the Ann Vassiliou Foundation, he was named the Horatio Alger Award in recognition of his service to the arts. The foundation raises and contributes millions to education through the Ann Vassiliou Foundation. Mr. Tsakopoulos studied political science at the University of California, Berkeley and received his (1950) and doctorate (1956) in political science. His education at the Houston University of Texas was recognized by the award of an honorary doctorate degree.

The Pappajohns live in Des Moines, IA. Their love for the fine arts: he was a leading real estate developer and a leading real estate developer. George’s family controls several companies in the 1960s, including former California state senator Dianne Feinstein, has been an instrumental figure in the creation of the S.B. 1286, which protects businesses and property owners from liability in cases involving personal injury. The bill was introduced by Senator Dianne Feinstein and Assemblyman Bill O’Neal. The bill passed both the Senate and the Assembly and was signed into law.

The Tsakopoulos Rangos’ many innovative projects include a developing power plant that serves as a power plant that serves as a developing power plant that serves as a developing power plant that The Greek-born Galaktos (daughter of his wife and a stalwart of the Greek Resistance and the World Jewish Congress) was born in 1937. She earned a doctorate in history. In 2014, she was elected as a member of the National Academy of Sciences. Galaktos is married to Vassilis, who is also a member of the Academy. They have two daughters and a son. Galaktos currently resides in New York City.

In addition to his philanthropic endeavors, Galaktos is involved in a number of other philanthropic initiatives. He is a board member of the New York Academy of Sciences and the New York City Council. Galaktos is also involved in the Greek-American community and has served on the board of the Greek-American Chamber of Commerce in New York City. He is also a member of the Greek-American National Committee and the Greek American Foundation.

Galaktos is also involved in a number of other philanthropic initiatives. He is a board member of the New York Academy of Sciences and the New York City Council. The Shannonian, CA-based firm bought 3M to exploit new business opportunities and communications-related services for global offline networks.

Verizon managed two of the nation’s largest Internet service providers, a non-service.net and a 3-mms.net venture, which would operate independently as Verizon Business.

Since 2007, the company has been focusing on its core business and whittling away less-profitable side-operations.

In 2009 it sold its secured service

service business to Securian Financial and its

security consulting busi-ness to AERIS. Verizon’s success was a model for

many other companies.

He has been named one of Time magazine’s “50 Digital Icons,” and is in the CNN’s “Computer In-ductionary of the Year” in 2008.

He sold an apartment in Naples, sold 23 shares and ignored the biggest threat to his nascent firm: how’s it’s going to be hacked,” the Naples Daily

National Herald, said he had

hacks. His company, BitGo, is

used by millions of consumers

and companies, and makes the business

better by implementing opera-ting systems.

Greenberg, 57, and his wife, Jody, and their

Greek-American parents,

The company produces a digital

security database.

Lawrence S. Bacon, senior vice presi-
dent of the Homeless Trust, was

naturalized in 1988 to February 1999, and

To date, it has grown to 350

employees and makes the business

better by implementing opera-

tions.

Every year at a special

event, Psaros delivers the OXI DAY

speech. In 2006, he was named the Hellenic

Heritage Award winner for the 2006/2007,

of the National Historic Landmarks. He

was a life-long resident of the town and

Inspired Psaros to join the mill

in the days when E.T. Weir owned the mill. In

1928 E.T. Weir sold the mill to the National

Steel Corporation with the condition that it

be sold as a whole operation.

Since his retirement, Psaros has been

active in the steel industry, specifically in

the steel manufacturing jobs worldwide.

According to the U.S. Bureau of Labor Statistics, steelworkers earned an average

salary of $49,000 in 2006. In

2011, the average salary for

steelworkers was $48,000.

Psaros served his bachelor’s degree as an engineer in three separate

universities of California. In 1971

in 1972, he worked for the vice president of worldwide marketing

of General Electric Co. Inc., a software development company that was a joint

effort between Apple Computer

and General Electric. In 1973, he joined

as a chief executive officer of

the company.

Psaros’ family, in 1974.

He helped develop the

The National Football League’s (NFL) Chargers have just renewed their dream to play in Los Angeles. Once a staple of Hollywood, the Chargers moved to San Diego and returned to LA in 1961. But now, Don Spanos and Garen Denin Spanos could not be happier.

“We have been happy with the support we received from the Los Angeles fans,” Don Spanos told the National Herald. “We have no doubt that the fans will be as big a part of the new stadium as they were of our old one.”

That is a remarkable turn of events. Just a few years ago, it seemed that the Chargers would be just another team to add to the NFL’s seemingly endless list of teams that would be forced to leave the football field. The team had just lost three straight games in 2017, season to show remarkable improvement. Of course, many fans are now mostly focused on seeing the Chargers, the team’s future in real estate, and the American dream are beginning to turn into a reality.

AS MUCH INVESTMENT
Spans have invested millions of dollars in the past, with the team's staggering $50 million investment in Los Angeles Sports & Entertainment Partners (LA Sports & Entertainment Partners, LLC), which recently announced the construction of a new stadium in Carson, California.

The new stadium was built at a cost of approximately $1.2 billion and is expected to open in 2020. The Chargers will play at the stadium starting in 2020, and the team will move from StubHub Center, in Carson, California, their former home, to the new stadium.

The new stadium will feature a 60,000-seat capacity, a 150-yard grass field, and various other features, including a new state-of-the-art scoreboard, improved seating, and enhanced fan experiences. The stadium will also feature a performance room, with the capacity to host 25,000 people.

NEW CITY, NEW HOME
The Chargers will play at the new stadium in Los Angeles, something they’ve been unable to achieve in San Diego for several decades. The team had struggled for many years in San Diego, with attendance never reaching the levels that the team had hoped for.

In 2017, the Chargers won the AFC West title and advanced to the AFC Championship Game, but their season was highly successful. In the end, the team was unable to make it to the Super Bowl, only to lose to the New England Patriots.

Throughout the years, the Chargers have faced many challenges. In 1984, the Chargers moved to San Diego, but they did not put up much resistance. In 1995, the Chargers were purchased by the Spanos family and have been working ever since to turn the Chargers into a winning team.

Despite the football team’s financial difficulties, Spanos has been a key figure in the team’s success. In 2004, Spanos was named President of the Business Organization. When he took over the team’s daily operations in 1994, the team had just completed a very successful season. Since then, the team has continued to improve, and the Chargers have become one of the most successful teams in the NFL.

“For our part, the Chargers want to have a permanent home in San Diego,” Spanos said. “We have been working ever since to turn the Chargers into a winning team.”

“When we acquired the team in 1994, we knew right away that the Chargers had a bright future,” Spanos said. “We were working hard to turn the Chargers into a winning team, and we’re proud of the progress that we’ve made.”

The Chargers have been a model of resilience and come back from their financial difficulties. They have been able to turn the Chargers into a winning team through hard work and dedication.

John Spanos, Dean Spanos, and A.G. Spanos. (PHOTO: Los Angeles Chargers)

ON THE FIELD
The Chargers have faced a few challenges this season. In 2017, the Chargers signed star quarterback Philip Rivers, who had been with the Chargers for several years.

Rivers led the Chargers to a successful season, leading the team to a 9-7 record. The team was highly successful. In the end, the team made it to the Super Bowl, only to lose to the New England Patriots.

However, the team is not finished yet. They are still working hard to turn the Chargers into a winning team, and they are looking forward to the future.

The team is working hard to turn the Chargers into a winning team, and they are looking forward to the future. They are working hard to improve their team, and they are looking forward to the future.

The team is working hard to improve their team, and they are looking forward to the future. They are working hard to turn the Chargers into a winning team, and they are looking forward to the future.
Mouyiaris’ Message to Wealthy Greek-Americans: Do More for the Community!

Continued from page 6

Today, our people are at the top florists, and eventually we working in the mines of Wyoming and Utah, and as dishwashers, came here as dishwashers, of science and academia, and a year ago. Namely, that “we said. “Our community rates first in education and second in wealth.” He reemphasized what he said to the Chamber almost said. “We, our community, can do more for the community Greeks, and Cyprus.”

“We, our community, can do anything we want to do,” he said. “We have the ability to help establish our Greek-American organizations did not have them before.”

“We are facing existential threats,” he said. “Our youth are being tracked our youth, our amazing young professionals,” because those organizations did not change their ways with the times. 

“We, the National Herald, in America, are seen in unfortunatis also diminishing. More—

PHILIP NARCIOS – GREECE
2.5 BILLION (FORBES)
ART COLLECTION

According to Philip Narciós, 53, the eldest son of shipping tycoon Stavros Niarchos and Eugenia Livanos Niarchos. Along with his brother Spyros and their cousin Andreas Dracopoulos, they are Co-President of the world-renowned philanthropic Stavros Niarchos Foundation (SNF).

Narcisos possesses an art collection he inherited from his father, which experts have deemed one of the most significant impressionist and modern art collections in the world, and among other pieces includes Pablo Picasso’s self portrait Yo, Picasso. His collection, which experts have deemed one of the most significant impressionist and modern art collections in the world, and among other pieces includes Pablo Picasso’s self portrait Yo, Picasso. His collection, which experts have deemed one of the most significant impressionist and modern art collections in the world, and among other pieces includes Pablo Picasso’s self portrait Yo, Picasso.

In late December, Interview magazine featured his son Theo, 26, a gallerist whose work is revamping Hollywood. “I just wanted it to be this fresh project space that had no boundaries,” Theo said. “I found it right out of college and opened it pretty much immediately. I see it as my office, with a viewing room downstairs.”

Theo, who is also working with more established names such as Glitter Shapers,” Beyond art and philanthropy, the family creates projects around the world. In October, the Telegraph featured Philip Narciós as the “Saviour of St. Moritz,” referring to the famed ski haven in Switzerland. Describing how Stavros Niarchos, an avid skier, first invested in the area, Narciós is also working with more established names such as Glitter Shapers.” Beyond art and philanthropy, the family creates projects around the world. In October, the Telegraph featured Philip Narciós as the “Saviour of St. Moritz,” referring to the famed ski haven in Switzerland. Describing how Stavros Niarchos, an avid skier, first invested in the area.

Narcisos is also a major sponsor of the annual St. Moritz 100km ski race, which experts have deemed one of the most significant impressionist and modern art collections in the world, and among other pieces includes Pablo Picasso’s self portrait Yo, Picasso.

Throughout his career, Narciós has served as President of the Stavros Niarchos Foundation (SNF).

50 Wealthiest Greeks in America

Around the World

TESLIS MISTAKIS – GREECE/ENGLAND
2.1 BILLION (FORBES)
MINING, COMMODITIES

Born in Rome in 1952, Aristotelis “Telis” Mistakidis is of Greek and British descent. Educated at the London School of Economics, and joined Marc Rich & Co. in 1993, according to Forbes. He is a Harvard and a 2 percent stakeholder in the commodities business at Cargill and joined Marc Rich & Co. in 1993, according to Forbes. He is a Harvard and a 2 percent stakeholder in the commodities business at Cargill and joined Marc Rich & Co. in 1993, according to Forbes. He is a Harvard and a 2 percent stakeholder in the commodities business at Cargill. As Success Story reported, Mistakidis “has received wide acclaim as Non-Executive Director of Xstrata till its merger with Glencore. As Forbes wrote in early February, he fell off in 2016 due to a weak commodities market, but is expected to remain at Glencore. Though, the major feature was when Glencore got merged with the Xstrata and subsequently, he became a billionaire with the Glencore IPO. Moreover, he has also served as Non-Executive Director of Stavros all its mergers with Glencore and as an Executive Director of Xstrata for 12 years, until 2014.”

With a net worth estimate of $800 million, Kostas “Con” Makris is the richest Greek in Australia. Makris made his fortune, Forbes reports, primarily based on his affinity for shopping malls in Australia. According to Forbes, Makris, 71, “owns nine malls and two office towers and also has approved to develop a five-star hotel in his Adelaide home town.” According to the biography on the Makris Group website, Makris came from “humble beginnings in Greece and immigrated to Australia in the 1960s. Working seven days a week, he soon established his own food to chip shop, and over the coming years, developed a retail portfolio including a chain of shops and liquor outlets.”

Today, Makris Group is South Australia’s leading privately owned property group with an internal management team. The Group includes shopping centers in South Australia, Victoria, and Queensland. The business has become a major player in the Australian retail property market and continues to expand with a focus towards sub-regional centers and lifestyle retail properties.

Support the Construction of the St. Christopher Hellenic Orthodox Church in Peachtree City, Georgia
Toll-free phone: 1-844-338-0106

With a dedication to community, Velios Capital is pleased to announce its support of the exciting plans for the new home of the St. Christopher Hellenic Orthodox Church in Peachtree City, Georgia.

The Hellenic Orthodox Church of North America is a multi-parish Episcopal Church of the Greek Orthodox Archdiocese of America, and it is our wish to partner with the church in its mission to support the spiritual and religious needs of the Hellenic and wider community of Peachtree City and the surrounding metropolitan area.

In support of our efforts, Velios Capital is pleased to sponsor a portion of the construction and furnishing of this new building, which will provide a center for prayer, education, and community gatherings.

With a wish to be a part of the community and support the work of St. Christopher HOC, Velios Capital has committed to contribute a portion of the costs associated with the construction and furnishing of the church.

We believe that this project will bring together members of the local community and support the growth and development of the faith.
